Conventional plate accessory design with a standard 6mm return on the plate depth, limits the design opportunities in many installations by virtue of the fact that the plate becomes the feature instead of complementing the features of the decoration in a room.

The DEFINE flat plate range of accessories offers up a host of new design opportunities with a comprehensive range of electrical accessory products available in 5 different decorative plate finishes.

The comprehensive range of products includes plate switches of different construction, including traditional 'dolly' style, contemporary self coloured Ingot switches and, of course, rotary dimmer switches. The modular construction of the standard moulded CLICK range of switches has been incorporated into the DEFINE range. When used in conjunction with the the MINIGRID range of blank mounting plates, customised switching

solutions can easily be created with a wide selection of module options.

Amongst the socket range can be found standard switched 13A sockets plus 2A and 5A round pin sockets for dedicated lighting circuits etc..

Different configurations of fused connection units and control switches, together with 45A switches and assorted data and media accessories all contribute to an exciting and aesthetically pleasing wiring solution offered by the high quality DEFINE product group.

All DEFINE products are available with black or white inserts, excluding black nickel finishes which are supplied with black insert and gasket only.

Every DEFINE product featured in the pages of this brochure is available in 5 distinctive quality finishes:

Polished Chrome, Stainless Steel, Brushed Steel*, Pearl Nickel and Black Nickel. *UK Design Registration 3015621

Switches

Modular Ingot Plate Switches
Dimmer Switches | Toggle Switches

Modular Switches – the standard switch modules used in the DEFINE product are self coloured Ingot style switches which feature single screw fixing to the face plate.

Design flexibility is enhanced by availability of multi-function and fully interchangeable modules from the MINIGRID range. Contact our Sales Office for a copy of the MINIGRID brochure and details on the range of modules available.

These non-furnished 1 & 2 gang plates offer the installer unprecedented flexibility in creating customised switch arrangements. A simple single screw fixing secures the required modules in position. A host of switching options can be achieved by selecting from our range of interchangeable modules.

All Define switch plates are modular as standard, allowing you to create virtually any switch plate you require e.g.

Two way switch next to an intermediate switch (shown above).

Switch modules interchangeable with MiniGrid Modules.

We recommend the use of branded halogen lamps with all DEFINE dimmers. The use of inferior, non-branded lamps may require the nominal rating of the dimmer to be reduced. These dimmer switches have not been designed for use with LED lamps. However, they may be suitable for some good quality LED lamps. For further information please contact the Click Technical support team.
